Oğulcan Cevizci

Full-Stack & AI Engineer | React, Next.js, TypeScript, Node.js, Python, LLM Integration

Istanbul, Turkey | +90 535 261 7543 | cevziciogulcan@gmail.com | portfolio-cev5.vercel.app | linkedin.com/in/oğulcan-cevizci-937a99214 | github.com/oglcncvzc

SUMMARY

Full-stack engineer with 6 years of experience shipping production web applications in React, Next.js and TypeScript, currently leading frontend development of enterprise generative-AI products at Gürok Group. Builds end to end: product UI and component libraries, Node.js, .NET and Python (FastAPI) services, real-time WebSocket pipelines, and LLM, image- and video-generation integrations (OpenAI, Google Gemini, fal.ai). Mechatronics engineering background with hands-on IoT and telemetry experience.

PROFESSIONAL EXPERIENCE

Software Development Leader – Gürok Group, Istanbul — Jun 2025 – Present

- Lead frontend engineering for the group's enterprise AI products, working with data science and backend teams on API contracts, real-time streaming and analytics dashboards.
- **Framely – generative AI product studio:** led the frontend of a platform that turns product SKUs into catalogue images and videos with fal.ai models (Nano Banana, Seedream, FLUX Kontext, Kling); ~97 screens, model-parameter forms generated from OpenAPI schemas, token-priced jobs with quota approvals and audit logs. Next.js, React 19, TypeScript.
- **Falaxy – AI fortune-telling mobile app:** Expo/React Native app with 12 animated screens and a FastAPI backend (41 REST operations) that generates readings with OpenAI structured JSON output, streamed chat, a memory system and on-device face-feature classification.
- **Hotel Review AI & pricing platform:** review intelligence and revenue dashboards – multi-platform review collection, LLM sentiment and topic analysis, AI reply drafts, scheduled AI reports and competitor rate tracking that feeds dynamic room-rate recommendations.
- **AI Influencer platform:** React/TypeScript frontend for AI-generated brand avatars, images and videos (OpenAI, fal.ai FLUX) with TikTok, YouTube and LinkedIn analytics; WebSocket job streaming with polling fallback and 53 typed API services.
- **Industrial tools:** glass-furnace raw-material optimiser with predictive models and plant-floor interfaces; decor paint calculator with KMeans colour extraction, Pantone (CIEDE2000) matching and ink-weight estimation.
- Built a shared React/Next.js/TypeScript component library that standardises the UI layer across internal AI products.

Frontend Developer – SST Technology — Feb 2024 – Jun 2025

- Delivered a single sign-on platform (authentication, token lifecycle, user profile settings) and a central admin hub for multi-company, multi-brand management with granular roles and permissions.
- Built large-scale B2B/B2C commerce panels for product management, cataloguing and order tracking, plus a performance-focused customer storefront.

Frontend Developer – SAMM Teknoloji — Jan 2023 – Feb 2024

High-traffic e-commerce listing and product detail pages with React, TypeScript, Next.js, Redux Toolkit and Ant Design.

Software Developer – TM2 Design & Projects — Mar 2022 – Jan 2023

Electric-vehicle telemetry processing in Python; live monitoring dashboards in React, React Native and Next.js.

Software Developer – Arga Teknoloji — Mar 2020 – Jun 2021

IoT control interfaces for embedded hardware using Python, WebSockets and serial protocols for industrial automation and assistive devices.

SELECTED PROJECTS

- **Coach Panel** (kocpaneli.online) – live volleyball team platform: rally-by-rally stats engine, federation fixture scraping on Vercel Cron, Supabase with 16 tables, 21 RLS policies and 4 roles. React, Supabase, Vercel.
- **PhiAI** (phitech.ai) – cognitive AI layer for robotics: product site plus PhiTalk, a real-time Turkish voice and vision assistant on Gemini Live (Vertex AI WebSocket proxy on Cloud Run, AudioWorklet audio, function calling).
- **Also:** 11gidiyor (marketplace repricing engine), Black Books & Coffee (QR menu) and Muhtelif Kitap (publisher site with CMS) as freelance work, Gönder Satalım, Bynintu, Boya Sepeti.

EDUCATION

MBA, Business Administration – Kocaeli University — 2023 – Present

BEng, Mechatronics Engineering – Istanbul Commerce University — 2018 – 2021

English-medium; GPA 3.03/4.00; thesis on image processing and robotic arm control

SKILLS

Frontend: React, Next.js, React Native (Expo), TypeScript, JavaScript (ES6+), Redux Toolkit, Zustand, TanStack Query, HTML5, CSS3, Tailwind CSS, Ant Design, GSAP, WebGL

Backend & data: Node.js, .NET (C#), Python, FastAPI, REST, WebSockets, gRPC, WebRTC, PostgreSQL, Supabase, MongoDB, Redis, RabbitMQ

AI: LLM integration (OpenAI, Google Gemini, Vertex AI), structured JSON output, streaming chat, function calling, prompt engineering, image and video generation (fal.ai)

DevOps & cloud: Microsoft Azure (App Service, Static Web Apps, DevOps pipelines, Blob Storage), Google Cloud Run, Vercel, Docker, Portainer, GitHub Actions, CI/CD

LANGUAGES

Turkish – Native; English – C1
